

Statistical Distributions across 5 Core Physical Target Properties

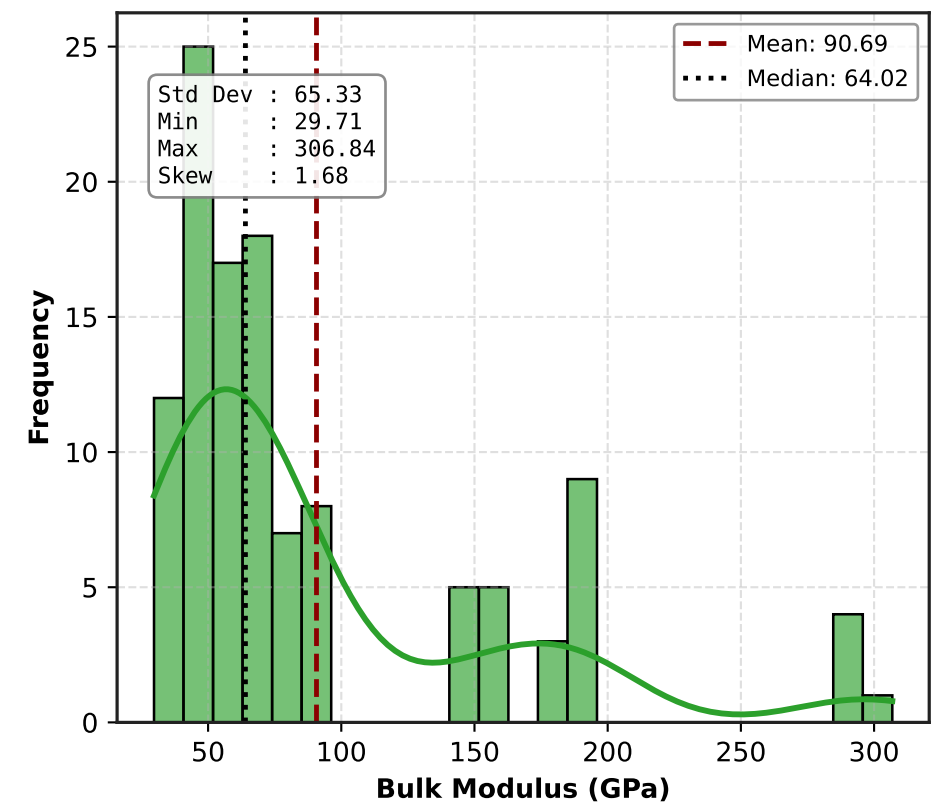

(a) Distribution of Band Gap (eV)

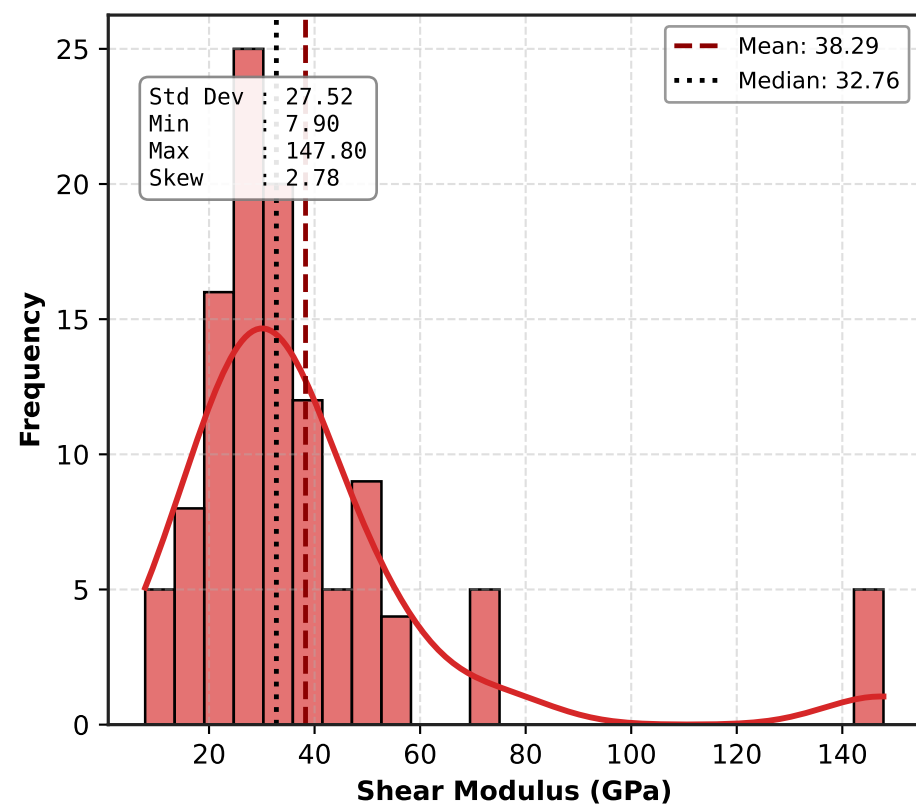

(b) Distribution of Formation Energy (eV/atom)

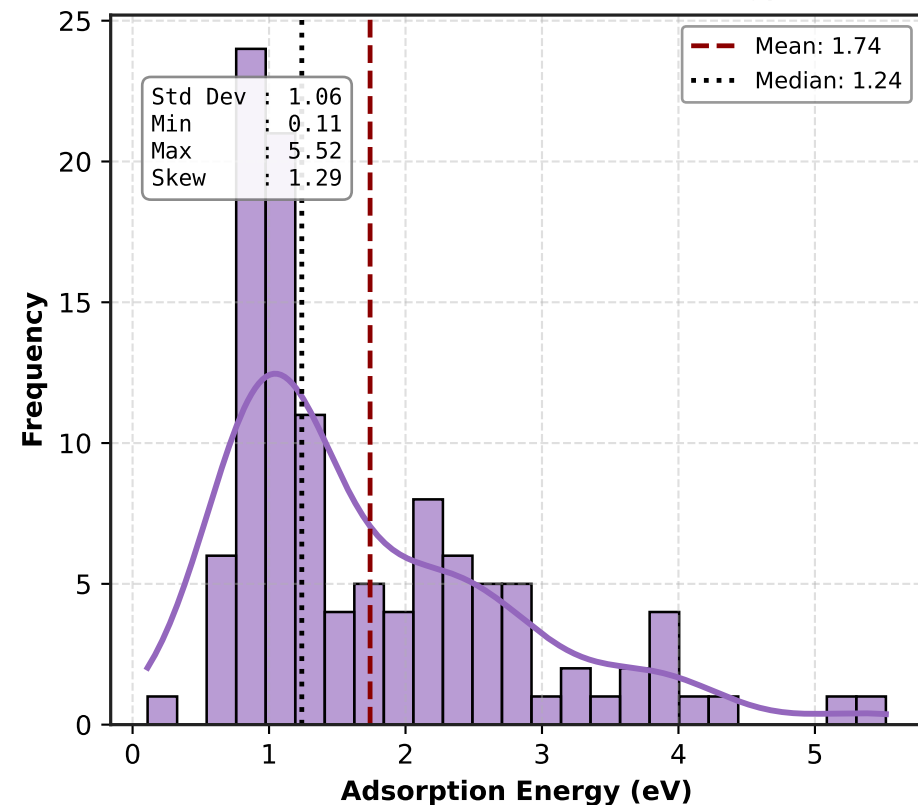

(c) Distribution of Bulk Modulus (GPa)

(d) Distribution of Shear Modulus (GPa)

(e) Distribution of Adsorption Energy (eV)

SUMMARY OF 5 CORE TARGET PROPERTIES

- Band Gap (E_g) : Electronic Conductivity
- Formation Energy (E_f): Thermodynamic Stability
- Bulk Modulus (K) : Hydrostatic Volume Stiffness
- Shear Modulus (G) : Mechanical Shear Strength
- Adsorption E_{ads} : Chemical Polysulfide Anchoring
